

100 Days of Linux - Day 018

Title: Revision Quiz #2 - File Viewing & Editing

Today's Goal

Review everything learned from Days 11–17 by completing practical tasks. No new commands are introduced today.

Why This Matters

Repetition and hands-on practice help you remember commands and build confidence using the Linux terminal.

Commands Covered

cat, head, tail, less, more, nano (plus basic navigation commands learned earlier).

Revision Notes

Before starting, try to recall what each command does without checking your notes.

Practice Questions

1. Create a file named review.txt using nano. Write at least 12 lines, save it, and exit.
2. Display the entire contents of review.txt using cat.
3. Display the first 5 lines and the last 5 lines of review.txt.
4. Open review.txt with less, search for a word, then quit. Next open it with more and move to the next page before quitting.
5. Display your current working directory and list all files in the current directory.

Hints

Use nano to edit, cat to read, head/tail for partial views, and less/more for interactive browsing.

Mini Challenge

Create a file named linux_journey.txt with 20 lines. View it using cat, head -n 3, tail -n 3, less, and more.

Common Mistakes

Forgetting to save in Nano before exiting. Use Ctrl+O, Enter, then Ctrl+X.

Did You Know?

Many production servers are managed entirely through terminal-based tools like the ones you've learned.

Pro Tip

Choose the right tool: cat for small files, head/tail for quick inspection, less for large files, and nano for editing.

Answer Key (Instructor Only)

Q1: nano review.txt (Ctrl+O, Enter, Ctrl+X)

Q2: cat review.txt

Q3: head -n 5 review.txt && tail -n 5 review.txt

Q4: less review.txt (/, q) then more review.txt (Space, q)

Q5: pwd && ls

Homework

Create three text files and practice every file-viewing command without looking at your notes.

Next Day Preview

Tomorrow you'll continue with additional file editing practice and begin preparing for more advanced text-processing tools.
